

# UNIVERSAL

# CHECK VALVE

**SE**  
**Seppmann  
Enterprises**

**A universal check valve allows you to service or remove your hydrant quickly without turning off the water.**

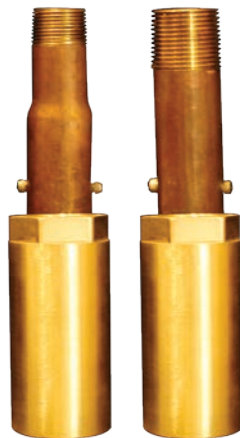

The Universal Check Valve is an optional add-on to any Hydrant Assist Kit (HAK).

*Patent Pending*

**Check Valve  
available in 2 sizes:**

**3/4"**

**1"**

**PROVIDES  
great versatility to  
use your hydrant  
site as a "port" for:**

- **livestock watering systems**
- **quick-fill pipes for filling spray barrels**
- **lawn irrigation systems**
- **homes without basements/  
mobile homes**

# BENEFITS

- Made to work exclusively with Hydrant Assist Kits (HAKs) – can be installed with your HAK or added later.
- Saves time and increases customer satisfaction because there's no need to shut off watermain/well/water supply to service hydrant.
- Allows you to switch hydrant brands/models/bury depths without digging up the HAK.
- Allows you to remove hydrant for winter months; riser pipe can then be capped.
- Simplifies residential lawn irrigation installations, repairs, and blowouts – again no need to shut off water supply to perform maintenance.
- Provides options for winterization and instant access during winter months at lake cabins and campgrounds.

## UNIVERSAL CHECK VALVE

- Quick service – no need to turn the water off
- Flexibility to use hydrant site as a "port"
- Winterization options with ready access to water supply during winter months
