1

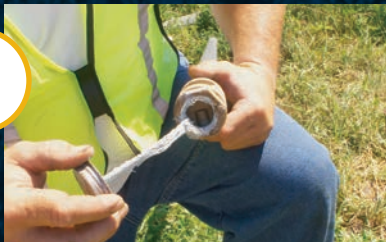

With water turned off, unbolt the 2-piece locking cap.

2

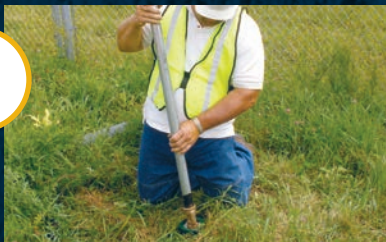

Unscrew hydrant from the 3" brass coupler at the bottom of the hydrant assist kit.

3

Put pipe sealant on female threads of new hydrant or pipe to be installed.

4

Lower pipe down the hole, being careful not to damage coupler threads. Screw hydrant into coupler. Do not over tighten.

5

Turn water on and check for leaks. Rebolt 2-piece locking cap into place.

SEPPMANN ENTERPRISES, LLC

## HYDRANT ASSIST KIT

*fits any yard hydrant currently manufactured*

*Have you ever installed a hydrant and said to yourself "I hope I never have to come back to dig this one up"?*

A Hydrant Assist Kit is an encasement package that attaches a yard hydrant to a waterline. Once installed it eliminates the need for costly and dangerous excavating by allowing servicing of the hydrant from the surface, rather than digging down to the water line. A hydrant can be easily replaced without disturbing adjacent utilities.

### *One product...several applications!*

- Yard Hydrants
- Livestock Watering Systems
- Under Homes without Basements
- Lawn Irrigation Systems
- Campgrounds
- Trailer Homes
